Individual Income Tax Returns, Preliminary Data, 2001

Data Release

axpayers filed 130.5 million U.S. individual income tax returns for Tax Year 2001, an increase of 0.9 percent from the 129.3 million returns filed for 2000. Tax Year 2001 had several notable changes. Adjusted gross income less deficit (AGI) decreased 2.3 percent to \$6.2 trillion. Taxable income declined 5.2 percent to \$4.3 trillion. Total income tax decreased 8.6 percent to \$892.3 billion, and the alternative minimum tax fell 32.5 percent to \$6.0 billion.

Figure A shows that the largest component of AGI, salaries and wages, increased 2.6 percent to \$4.6 trillion for Tax Year 2001, while the next largest component of AGI, taxable pensions and annuities, rose 3.9 percent to \$344.3 billion. Declining income items were led by net capital gains, which decreased by 44.5 percent to \$326.4 billion. Dividends also fell 18.4 percent to \$116.0 billion. Other income items with large percentage changes included unemployment compensation, which increased 60.1 percent to \$27.2 billion, and capital gain distributions declined 82.8 percent from \$80.7 billion in 2000 to \$13.9 billion in 2001. Also, net capital loss in AGI was up from Tax Year 2000, increasing by 68.8 percent to \$22.9 billion.

Statutory adjustments to total income increased 3.7 percent to \$58.6 billion for Tax Year 2001. The largest statutory adjustment was the deduction for one-half of self-employment tax, representing 29.6 percent of the total. This adjustment to income increased 4.2 percent to \$17.4 billion. The self-employed health insurance deduction increased 8.1 percent to \$7.7 billion. Payments to self-employed retirement plans rose 4.9 percent to \$12.5 billion. The deduction for interest on qualified student loans increased 3.3 percent to \$2.7 billion (see the Changes in Law section for details).

Total deductions, the sum of the standard deductions and total itemized deductions (after limitation) equaled \$1,348.2 billion, an increase of 6.2 percent from Tax Year 2000. The number of returns claiming the standard deductions decreased 1.4 percent, accounting for 64.8 percent of all returns filed and 34.8 percent of the total deductions amount. Mostly

This data release was written by Brian Balkovic, an economist with the Individual Returns Analysis Section, under the direction of Terry Nuriddin, Acting Chief. due to inflation indexing, the average standard deduction (comprised of the basic and additional standard deductions) increased 4.2 percent from \$4858 for 2000 to \$5,061 for 2001. Itemized deductions were claimed on 34.1 percent of all returns filed for 2001 and represented 64.1 percent of the total deductions amount. The average total for itemized deductions (after limitation) was \$19,392, a 3.3-percent increase from the 2000 average of \$18,777. Due to the AGI limitation on itemized deductions, 5.7 million higherincome taxpayers were unable to deduct \$30.4 billion in itemized deductions, a decrease of 16.4 percent from 2000. The interest paid deduction, comprising the largest portion (39.4 percent) of total itemized deductions (before limitations), increased 9.3 percent to \$340.2 billion. The taxes paid deduction, accounting for 35.3 percent of the total (before limitations), increased 5.1 percent to \$304.4 billion. The charitable contributions deduction increased only 0.3 percent to \$134.0 billion. For 2000, charitable contributions had increased more than 11 percent.

Total tax credits used to offset income tax liabilities increased 23.4 percent to \$45.2 billion. Almost 26.6 million taxpayers claimed \$22.5 billion in child tax credits, up 14.3 percent from \$19.7 billion in 2000 (see the Changes in

Total income taxdecreased 8.6 percent to \$892.3 billion, and the alternative minimum tax fell 32.5 percent to \$6.0 billion.

Law section for details), and 7.3 million returns showed education tax credits totaling \$5.2 billion, a 6.5-percent increase from \$4.9 billion in 2000. The foreign tax credit increased 16.7 percent to \$5.9 billion.

The total earned income credit (EIC) increased 3.9 percent to \$33.8 billion for Tax Year 2001. The portion of the EIC used to offset income tax before credits decreased 24.7 percent to \$1.5 billion, and the portion of the EIC used to offset other taxes (such as the self-employment tax) rose 14.3 percent to \$2.9 billion. The largest part of the EIC, the refundable portion, was treated as a refund and paid directly to taxpayers who had no tax liability against which to apply the credit, or whose EIC exceeded income tax (and other taxes). The refundable portion of the EIC increased 5.0 percent to \$29.4 billion for 2001.

¹ Includes TeleFile returns.

² Included in data for Forms 1040, 1040A, and 1040EZ.

³ Not included in adjusted gross income.

⁴Includes capital gain distributions reported on Form 1040 and Schedule D.

⁵ Includes EIC used to offset income tax before credits.

NOTE: Detail may not add to totals because of rounding.

The comparisons of data for Tax Years 2000 and 2001 in this article are based on the preliminary estimates for both years. A few income and tax items tend to be understated in preliminary estimates; therefore, comparisons based on preliminary estimates for 1 year and final estimates for the previous year could be misleading. Comparisons based entirely on preliminary estimates reduce the likelihood of misinterpretation of the data and afford a more accurate representation of year-to-year changes. Final statistics for Tax Year 2000 are available in the Fall 2002 issue of the *Bulletin*.

Changes in Law

In general, the definitions used in this article are the same as those in *Statistics of Income*—2000, *Individual Income Tax Returns*. The following is a partial list of tax law and Internal Revenue Service administrative changes that had a major bearing on the Tax Year 2001 preliminary data presented in this article.

Alternative Minimum Tax (AMT).--For Tax Year 2001, the AMT exemption amounts increased by \$4,000 for married taxpayers filing joint returns and surviving spouses, and by \$2,000 for single taxpayers or couples filing separate returns. This increased the AMT exemption amounts to \$49,000 for married couples filing a joint return and surviving spouse, \$24,500 for married couples filing separate returns, estates, and trusts, and \$35,750 for single taxpayers and heads of household.

*Child Tax Credits.--*Modifications were made to the child tax credit for 2001. In 2001, taxpayers were allowed a maximum tax credit of \$600 for each of their qualifying children under the age of 17, whereas for 2000, the maximum credit was \$500 per child.

*Earned Income Credit.--*The maximum amount of the earned income credit increased, as did the amounts of earned income and investment income an individual could have and still claim the credit. The maximum amount of investment income (interest, dividends, and capital gain income) a taxpayer could have and still claim the credit increased to \$2,450 from \$2,400. The maximum credit for taxpayers with no qualifying children increased to \$364. For these taxpayers, earned income and modified AGI had to be less than \$10,710 (up from \$10,380 for 2000). For taxpayers with one qualifying child, the maximum credit increased to \$2,428, and, for taxpayers with two or more qualifying children, the maximum credit increased to \$4,008. To be eligible for the credit, a taxpayer's earned income and modified AGI had to be less than \$28,281 for one qualifying child, or less than \$32,121 for two or more qualifying children.

*Indexing.--*The following items increased due to indexing for inflation: personal exemption amounts, the basic standard deduction amounts, the tax bracket boundaries, and the beginning income amounts for limiting certain itemized deductions and for the phaseout of personal exemptions. The maximum amount of earnings subject to self-employment tax increased, based on the percentage change in average covered earnings.

Interest on Student Loans.--For Tax Year 2001, eligible taxpayers were allowed to deduct up to \$2,500 of interest paid on qualified higher educational loans, up from \$2,000 for 2000. These loans must have gone toward qualified expenses of either the taxpayer, taxpayer's spouse, or any dependent of the taxpayer at the time the debt was incurred. The taxpayer's modified AGI must have been less than: \$55,000 if single, head of household, or qualifying widow(er); or \$75,000 if married filing jointly.

*Rate reduction credit.--*Individual taxpayers who did not receive an advance payment equal to or more than the following amounts (\$300 single or married filing separately, \$500 head of household, and \$600 married filing jointly or qualified widower) were eligible to receive the 2001 rate reduction credit.

*Tax rate reduction.--*For tax years beginning after December 31, 2000, a new 10-percent regular income tax rate schedule will be used for a portion of the taxable income replacing the former 15 percent rate, but for Tax Year 2001, the 10 percent applies to the first \$6,000 for dependent individuals only. Other taxpayers received benefits equivalent to the 10-percent rate bracket via the rate reduction credit. Also, for Tax Year 2001, there was a reduction of the former tax rates of 28 percent, 31 percent, 36 percent, and 39.6 percent to 27.5 percent, 30.5 percent, 35.5 percent, and 39.1 percent, respectively.

Standard mileage rate.--The standard mileage rate for the cost of operating the taxpayer's car, van, pickup, or panel truck for all business purposes rose from 32.5 cents a mile in 2000 to 34.5 cents in 2001.

Data Sources and Limitations

The preliminary statistics in this data release are based on a sample of individual income tax returns (Forms 1040, 1040A, and 1040EZ, including electronically-filed returns) filed during Calendar Year 2002. Returns in the sample were stratified based on: (1) the larger of positive income or negative income; (2) the size of business and farm receipts; (3) the presence or absence of specific forms or schedules; and (4) the usefulness of returns for Treasury Department tax modeling purposes [1]. Returns were then selected at rates ranging from 0.05 percent to 100 percent. The preliminary Tax Year 2001 data are based on a sample of 156,735 returns and an estimated final population of 130,642,204 returns. The corresponding sample and population for the preliminary 2000 data were 129,585,856 and 160,213 returns, respectively.

Since the data presented here are estimates based on a sample of returns filed, they are subject to sampling error. To properly use the statistical data provided, the magnitude of the potential sampling error must be known; coefficients of variation (CV's) are used to measure that magnitude. The reliability of estimates based on samples, and the use of coefficients of variation for evaluating the precision of estimates based on samples, are discussed in the appendix to this issue of the *Bulletin*.

While the preliminary estimates are intended to represent a full year of taxpayer reporting, they are actually based on returns processed for tax administration purposes, in the case of 2001 returns, between January and late September of 2002. In general, returns processed during the remainder of each year tend to have somewhat different characteristics compared to returns processed earlier. These characteristics include, for example, disproportionately large amounts of investment income, passive losses, and alternative minimum tax.

Notes and References

 Returns in the sample were stratified, based on the presence or absence of one or more of the following forms or schedules: Form 2555, Foreign Earned Income; Form 1116, Foreign Tax Credit (Individual, Fiduciary, or Nonresident Alien Individual); Schedule C, Profit or Loss from Business (Sole Proprietorship); and Schedule F, Profit or Loss From Farming.
